

# Kotlin - Android App Assignment

Download the code for the simple calculator from this repo and fix the code in “MainActivity.kt” and “activity\_main.xml” so that the app works and looks like the image given. Comments on what to do is given in the code

2) Create an Android app named “Greeter” with kotlin that takes user name as input and shows “Hello <userinput>!”

Hint: Uses the following widgets and try to replicate the given layout.
